

SHRINE 3.3.1 Upgrade Chapter 10 - Try the New Features

After installing and configuring SHRINE, you can verify the installation by navigating to each application's login page and signing in.

- **Clear the browser cache**
- Navigate to the SHRINE Webclient - the url should be in the form of https://your_shrine_url:6443/shrine-api/shrine-webclient/ . This will be the application you use most often. Log in, construct, and run a query. Do this to test that the term index files are correct, and to test out the full flow through the system.

The screenshot shows the login interface of the SHRINE Webclient. At the top, there is a blue header bar containing the ENACT logo on the left and the text "The ENACT Network" on the right. Below the header, the main content area is white. In the center of this area, there is a "Sign in" section. This section includes a "Username" label above a text input field, a "Password" label above another text input field, and a blue button labeled "SIGN IN" positioned below the password field.
