

Case Studies

The SHRINE team and collaborators have deployed two successful networks.

- **SHRINE at Harvard Medical School (HMS)**, linking 5 HMS-affiliated hospitals:
 - Beth Israel Deaconess Medical Center
 - Boston Children's Hospital
 - Brigham and Women's Hospital
 - Dana–Farber Cancer Institute
 - Massachusetts General Hospital
- **SHRINE National**, a pilot linking eight medical centers nationwide to focus on discovering co-morbidities related to primary diagnoses of diabetes and autism:
 - Boston Children's Hospital
 - Cincinnati Children's Hospital Medical Center
 - Clinical Translational Science Institute at University of Washington
 - Michigan Institute for Clinical and Health Research
 - Partners HealthCare
 - The University of Texas Health Science Center at Houston
 - Wake Forest Baptist Medical Center
