## **Case Studies**

The SHRINE team and collaborators have deployed two successful networks.

- SHRINE at Harvard Medical School (HMS), linking 5 HMS-affiliated hospitals:
  - O Beth Israel Deaconess Medical Center
  - Boston Children's Hospital
  - Brigham and Women's Hospital
  - Dana–Farber Cancer Institute
  - o Massachusetts General Hospital
- SHRINE National, a pilot linking eight medical centers nationwide to focus on discovering co-morbidities related to primary diagnoses of diabetes and autism:
  - Boston Children's Hospital
  - Cincinnati Children's Hospital Medical Center
  - O Clinical Translational Science Institute at University of Washington
  - Michigan Institute for Clinical and Health Research
  - o Partners HealthCare
  - The University of Texas Health Science Center at Houston
    Wake Forest Baptist Medical Center
