net.shrine.adapter.CrcCouldNotBeInvoked

Summary

The SHRINE adapter encountered an exception while attempting to use the I2B2 CRC.

Explanation

There could be a myriad of reasons for this, most all of which fall under the domain of i2b2. It's possible that i2b2 itself is experiencing problems, or that the link between SHRINE and i2b2 (credentials or network connection) is faulty.

Resolution

If you are a user or an admin, send the admin at the reporting adapter all the details about this problem.
