net.shrine.adapter.service.UnknownRequestType

Summary

The Adapter received a request of a type that it cannot process.

Explanation

The Adapter only understands certain kinds of requests. This problem occurs when an Adapter receives a request that it does not understand.

Most likely an Adapter is receiving requests from a Hub or QEP running the next version of SHRINE.

Resolution

If you are a user, forward the details of the error on to your local site administrator.

If you are a site administrator, contact the adapter's administrator and ask about their configuration.

Retired in Shrine 2.1
