net.shrine.adapter.QueryQueuedTimeToLiveExceeded

Summary

Shrine's adapter has given up on this query after polling the CRC for a long period of time.

Explanation

After a CRC reports that a query is in a QUEUED (or related) state shrine's adapter begins polling periodically. If the CRC fails to respond with either results or definitive, recognized errors within a very generous time limit then shrine's adapter stops asking the CRC, gives up on the query, and reports this error.

Resolution

If you are a user or an admin, send the admin at the reporting adapter all the details about this problem. If you are the admin most local to this error, examine the query and determine if there is a way to enhance your CRC to more efficiently process this query, or all queries.
